App. No. 10/532,202 Amend. dated Dec. 18, 2009 Resp. to Final OA of Sept. 21, 2009

Listing of Claims:

Please amend the claims as follows:

 (Previously Presented) Pulverulent materials and mixtures thereof, comprising one or more surface-modified and structure-modified pyrogenically prepared metalloid or metallic oxides wherein the surface-modified and structure-modified pyrogenically prepared metalloid or metallic oxide is

a silanized structure-modified silica having alkylsilyl groups which are octylsilyl and/or hexadecylsilyl attached to said silica, and having the following physiochemical properties:

BET surface area	$25-400 \text{ m}^2/\text{g}$
Average primary particle size	5-50 nm
pH value	3-10
Carbon content	0.1-25%.

2. (Previously Presented) Method of improving the flowability of pulverulent materials and mixtures thereof, comprising adding to the pulverulent materials and mixtures thereof one or more surface-modified and structure-modified pyrogenically prepared metalloid or metallic oxides wherein the surface-modified and structure-modified pyrogenically prepared metalloid or metallic oxide is

a silanized structure-modified silica having alkylsilyl groups which are octylsilyl and/or hexadecylsilyl attached to said silica, and having the following physiochemical properties:

BET surface area	$25-400 \text{ m}^2/\text{g}$
Average primary particle size	5-50 nm
pH value	3-10
Carbon content	0.1-25%.

App. No. 10/532,202 Amend. dated Dec. 18, 2009

Resp. to Final OA of Sept. 21, 2009

3. (Cancelled)

4. (Previously Presented) A composition of matter comprising at least one pulverulent material which is a fire-extinguishing powder and at least one surface-modified pyrogenically prepared metalloid or metallic oxide wherein the surface-modified and structuremodified pyrogenically prepared metalloid or metallic oxide is

a silanized structure-modified silica having alkylsilyl groups which are octylsilyl and/or hexadecylsilyl attached to said silica, and having the following physiochemical properties:

BET surface area 25-400 m²/g Average primary particle size 5-50 nm pH value 3-10 Carbon content 0.1-25%.

5.-14. (Cancelled)
